THE TWO FACES OF XANADU

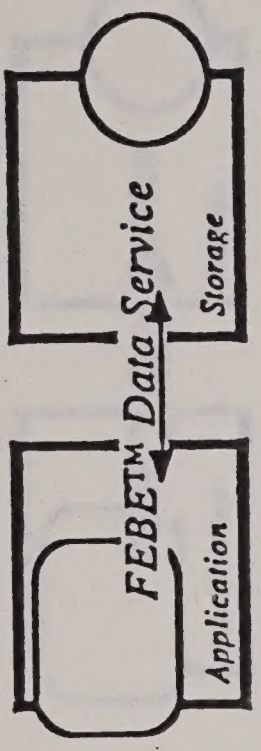
(The one that properly says "zealots

THE TWO FACES OF XANADU™

The story is spreading. Perhaps you've heard that a group of idealistic zealots is trying to create an instantaneous electronic publishing system that can eventually become the world's archive. This is true. But you better understand the details, because they will affect your software business, your publishing business, the way you read and write and think. For more information absorb Ted Nelson's book LITERARY MACHINES ($25 from Mindful Press, 3020 Bridgeway #295, Sausalito CA 94965).

THE SOFTWARE

THE NEW DATA STANDARD



A storage management program that provides a unified and rational framework for linking, arbitrary hypertext and hypermedia structures, versioning and backtrack, multi-author collaboration, instancing and multiple use of materials, and multi-media binding of materials across data types, storage media, drives and networks.

DEVELOPERS CONTACT:

THE PAX™ SERVICE

PAX will license the Xanadu software for public access. There will be two services:

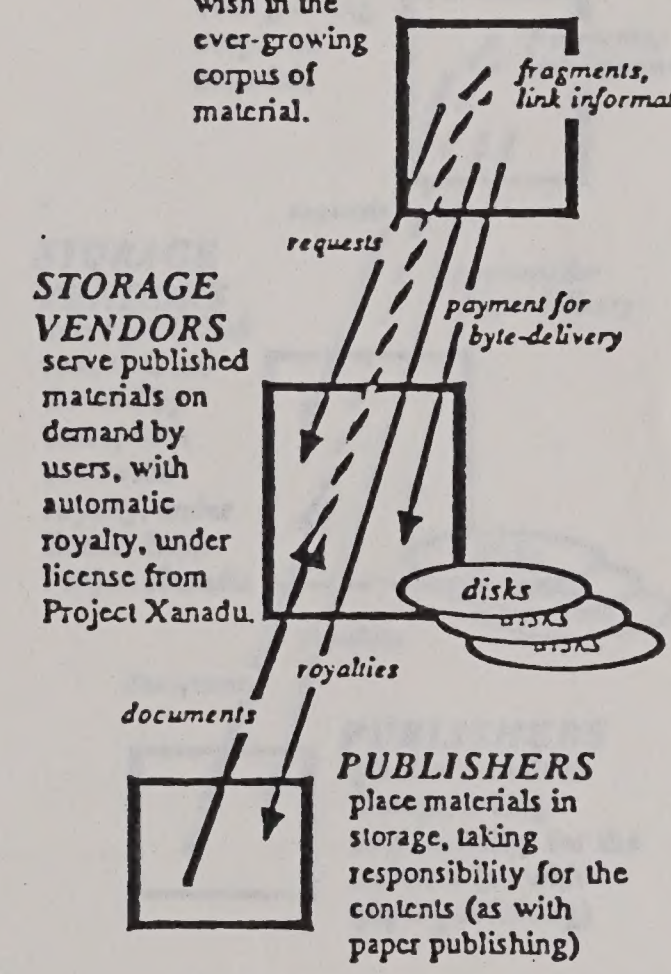
MINI-SELF-STORAGE FOR INFORMATION

We all need a place our data can be safely stored. Once there, we may easily make it available by--

THE PUBLISHING METHOD

USERS browse and proceed as they wish in the ever-growing corpus of material.

(Many users will also be publishers and vice versa.)



STORAGE VENDORS serve published materials on demand by users, with automatic royalty, under license from Project Xanadu.

PUBLISHERS place materials in storage, taking responsibility for the contents (as with paper publishing)
